Crown Castle Fiber

CONTRACT NUMBER: 190AN-MTTISAFBOS2022-0827

Crown Castle Fiber Services available in the following states:

AL, AZ, CA, CT, DE, FL, GA, IL, MA, MD, ME, MI, NC, NH, NJ, NY, OH, PA, RI, TN, TX, VA, VT, WDC

Section 9 - Description of the Products

Wavelength:

Our fully managed, private, point-to-point Wavelength solutions provide dedicated bandwidth and a fixed latency to guarantee performance when needed. The wavelength product is delivered over a state-of-the-art Dense Wave Division Multiplexing (DWDM) network. Enables the extension of LAN infrastructures for WAN, MAN, or SAN connectivity in the metro or nationwide. Provides flexible, transparent bandwidth that supports most major protocols. Protected and unprotected wavelength configurations are available.

- Optional Layer 1 optical encryption and Managed Private Optical Networks (MPON) also available

Switched Ethernet:

Our Ethernet solutions enable the extension of dedicated or virtual LAN infrastructures for WAN connectivity, with committed information rates from 10Mbps to 100Gbps and guaranteed network performance.

- **E-Line:** A port-based Product providing dedicated UNIs for point-to-point connections. E-Line supports a single EVC between two (2) UNIs. Dedicated UNIs for point-to-point connections, simple and secure. Interfaces available 1GE, 10GE. Bandwidth options from
- **EVPL:** A flexible, VLAN based Product providing multiplexed UNIs allowing multiple EVCs per UNI. Node Interfaces available at 1GE, 10GE. Hub Interfaces available at 1GE, 10GE, and 100GE(ICB). Bandwidth options from 10Mbps – 10Gbps.
- **E-LAN:** VLAN based meshed Product providing many-to-many communication with dedicated or service-multiplexed UNIs. E-LAN supports transparent LAN and multipoint Layer 2 VPNs. Crown Castle recommends limiting the number of VLAN Nodes to 25 or fewer. Interfaces available 1GE, 10GE. Bandwidth options from 10Mbps – 10Gbps.
- **Metro-E Advanced Private Line:** Private Ethernet delivered over dedicated fiber with switches deployed at each end-user location across a metro area. Interfaces available 10GE, 100GE. Bandwidth options from 1Gbps – 100Gbps

Dark Fiber:

Fiber Optic Strands which are not LIT.

Crown Castle Fiber's unique fiber assets, routes and secure rights-of-way provide the network infrastructure that your business needs, where you need it, to support mission-critical applications.

Internet Access Services:

Crown Castle Fiber offers organizations a reliable, scalable, dedicated high-speed fiber-optic connection to the Internet. With access to our robust and diverse fiber network and multiple, private, and geographically diverse Tier-1 Internet connections, you'll get reliable, high-speed network performance

Dedicated Internet Access (DIA) and Internet Access (IA)

- **DIA:** Dedicated Tier 1 internet access over Layer 2 Ethernet Typology. Includes transport and access
- **IA:** Internet Access is available at any of our data centers or interconnection facilities

DDoS Defense

Crown Castle DDoS Defense includes: Proactive Traffic Monitoring 24/7/365, Attack detection, Unlimited Mitigation and Portal Access for threat visibility and attack reporting. Our in-line DDoS Defense technology has the capability to block the DDoS attack traffic at the network perimeter before it could negatively affect the subscriber network resources.

severely impacted. In the event of an attack, the target traffic is re-routed to our in-network scrubbing facility to proceed with a surgical mitigation where the unwanted traffic is removed and the clean traffic is allowed to flow to your network. **MUST BE A CCF Dedicated Internet Access -or- Internet Access Customer to utilize this service.**

DIA Plus

Bundling of DIA + DDoS Defense products to provide a package promotion of product pricing.

Managed SD-WAN

Managed SD-WAN is a fully Managed Solution which is an application of Software Defined Network (SDN) technology. It is an overlay network running over underlay networks (e.g. public internet, MPLS). It does not interact with the underlay network (transport). Provides a virtual overlay network that enables application aware, policy driven and orchestrated connectivity between SD WAN User Network Interface.

configuration to provide redundancy. The two appliances are connected to each other with a fallback mechanism based on pre determined policies, if the primary device has an issue, the traffic will default to the second device.

Next-Gen Firewall - Consists of the following additional security features that can be enable if desired including: IP Filtering, URL/Domain Filtering.

Cloud Connect

Dedicated Connectivity to cloud computing network environment. Transport only to AWS, Azure and/or Google Cloud. (Ashburn, VA). Circuit capacity ranges from 50Mbps to 100Gbps depending upon the target CSP.

Connections to Azure may require additional equipment on the premises depending on capacity and architecture.

** Once a total of 24 months of the Monthly Recurring Cost have been paid by one or more Using Agency(ies) for Services in a given building, the Monthly Recurring Cost for the Fiber Lateral Construction line item for all Using Agencies with Services within that building will be eliminated. The building will then be reclassified as on-net for existing and future Using Agencies.

Billing Structure Description:

All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.

DWDM Service - Crown Castle Fiber delivers Ethernet Private Line products over DWDM. Please see the billing descriptions under those product headings for specific details.

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Notes:

1. **Ceiling Pricing.** Crown Castle Fiber always reviews the specific conditions of a service request in order to develop the most cost effective solution for the customer. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.
2. **Renewal Discount.** If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
3. **Crown Castle Fiber Upgrade Plan.** Crown Castle Fiber wants to enable its customers to buy the bandwidth and services that they need at the time that they need it. Crown Castle Fiber's MiCTA customers may upgrade their existing bandwidth at a Crown Castle Fiber-serviced location without an upgrade charge. Crown Castle Fiber will also allow MiCTA customers to convert a Crown Castle Fiber DWDM service to a Crown Castle Fiber Dark Fiber service without a charge for terminating the DWDM service; for such conversions, Crown Castle Fiber may require a minimum term for the Dark Fiber service and additional costs (e.g. construction or third-party costs) may apply to these conversions.
4. **The Ethernet Services proposed in this Cost Table meet our standard commercial SLA level A.** Crown Castle Fiber offers Ethernet Services at two additional higher SLA standards. For SLA level AA, Crown Castle Fiber provides a second Ethernet Service at the same location using the same cable facilities and routing. The additional circuit increases the reliability of the service as described in SLA level AA and costs 150% of the prices in this Cost Table. For SLA level AAA, Crown Castle Fiber provides a second Ethernet Service at the same location using a separate fiber cable and diverse routing. The cost of Ethernet Service at the SLA AAA level is 200% of the prices in this Cost Table, plus any Special Construction costs for the diverse cable routing.
5. **EPL over DWDM is a point-to-point service with two mirrored services.** EPL consists of a 100/1000/10,000/40,000/100,000M node at each customer location. Crown Castle Fiber does not charge for mileage. EPL service traverses dedicated DWDM and fiber networks not shared with other customers.
6. **"Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location.** In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
7. **Stranded Investment.** If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.
8. **The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises.** The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.
9. **Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified under Labor above.**
10. **Time Limited Special Pricing Offer-First Three Months MRC Waived - If any Using Agency(ies) enters into a sixty-month agreement for services within the first 90 days of contract award,** Crown Castle Fiber will waive the applicable MRC for such services for the first three months of the term, provided that if such Using Agency(ies) terminates the agreement prior to the end of the sixty-month term, it will be responsible for an additional three months under the stranded investment note below. Special construction charges, if applicable, will apply.
11. **Crown Castle Fiber does not price services based on Interlata/Intralata delivery.** Additional charges may be applied for Interstate connectivity based on bandwidth utilization.

Billing Structure Description:

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations.

Notes:

1. Ceiling Pricing. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.
2. Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
3. MPON is a Wavelength product and represents Dedicated circuit(s) between two (2) or more Locations over dedicated optical fiber infrastructure and dedicated Crown Castle Equipment at each Location.
4. Crown Castle Fiber Upgrade Plan. Crown Castle Fiber wants to enable its customers to buy the bandwidth and services that they need at the time that they need it. Crown Castle Fiber's MiCTA customers may upgrade their existing bandwidth at a Crown Castle Fiber-serviced location without an upgrade charge. Crown Castle Fiber will also allow MiCTA customers to convert a Crown Castle Fiber DWDM service to a Crown Castle Fiber Dark Fiber service without a charge for terminating the DWDM service; for such conversions, Crown Castle Fiber may require a minimum term for the Dark Fiber service and additional costs (e.g. construction or third-party costs) may apply to these conversions.
5. The Wavelength Services proposed in this Cost Table meet our standard commercial SLA's . For SLA level AA, Crown Castle Fiber provides two (2) separate fiber paths, one of which is the working (primary) path and the other the protect (secondary) path. Crown Castle is responsible for managing the Failover Switching between the working and protect paths. For SLA level AAA, Crown Castle Fiber provides two (2) wavelengths utilizing separate fiber paths, one of which is the working (primary) path and the other the protect (secondary) path.
6. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
7. Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.
8. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.
9. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified under Labor above.
10. Crown Castle Fiber does not price services based on Interlata/Intralata delivery. Additional charges may be applied for Interstate connectivity based on bandwidth utilization.

** Once a total of 24 months of the Monthly Recurring Cost have been paid by one or more Using Agency(ies) for Services in a given building, the Monthly Recurring Cost for the Fiber Lateral Construction line item for all Using Agencies with Services within that building will be eliminated. The building will then be reclassified as on-net for existing and future Using Agencies.

Billing Structure Description:

All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Notes:

1. Bundled Discount. For Ethernet service pricing bundled with Internet access service, see the Pricing Table above.
2. Ceiling Pricing. Crown Castle Fiber always reviews the specific conditions of a service request in order to develop the most cost effective solution for the customer. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.
3. Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
4. Crown Castle Fiber Upgrade Plan. Crown Castle Fiber wants to enable its customers to buy the bandwidth and service that they need at the time that they need it. Crown Castle Fiber's RI State customers may upgrade their existing bandwidth at a Crown Castle Fiber-serviced location without an upgrade charge. Crown Castle Fiber will also allow RI State customers to convert a Crown Castle Fiber Ethernet service to a Crown Castle Fiber Dark Fiber service without a charge for terminating the Ethernet service; for such conversions, Crown Castle Fiber may require a minimum term for the Dark Fiber service and additional costs (e.g. construction or third-party costs) may apply to these conversions.
5. The Ethernet Services proposed in this Cost Table meet our standard commercial SLA level A. Crown Castle Fiber offers Ethernet Services at two additional higher SLA standards. For SLA level AA, Crown Castle Fiber provides a second Ethernet Service at the same location using the same cable facilities and routing. The additional circuit increases the reliability of the service as described in SLA level AA and costs 150% of the prices in this Cost Table. For SLA level AAA, Crown Castle Fiber provides a second Ethernet Service at the same location using a separate fiber cable and diverse routing. The cost of Ethernet Service at the SLA AAA level is 200% of the prices in this Cost Table, plus any Special Construction costs for the diverse cable routing.
6. Metro-E Advanced Private Line (Metro-E APL) is a point-to-point service that is available within a metro (distance limitation is 80 km), and is priced as a complete service that includes both end locations. Metro-E APL service is delivered over private fiber with a switch at each end user location.
7. Switched E-Line is a point-to-point Ethernet Service. E-Line consists of a single line item for each customer location. Crown Castle Fiber does not charge for mileage. E-Line service traverses the Crown Castle Fiber MPLS core network using facilities shared with other customers.
8. Switched Ethernet LAN (E-LAN) service is a mesh Ethernet Service (any to any) priced as a single line item per customer location. Crown Castle Fiber does not charge for mileage. EVPL service traverses the Crown Castle Fiber MPLS core network using facilities shared with other customers.
9. Switched Ethernet Virtual Private Line (EVPL) is a hub and spoke service (one to many). EVPL consists of a single line item for each customer location. VLAN based Product providing multiplexed UNIs allowing multiple EVCs per UNI. Node Interfaces available at 1GE, 10GE. Hub Interfaces available at 1GE, 10GE, and 100GE(ICB). Bandwidth options from 10Mbps – 10Gbps. Crown Castle Fiber does not charge for mileage. EVPL service traverses the Crown Castle Fiber MPLS core network using facilities shared with other customers.
10. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.

11. Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.

12. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.

13. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.

14. Time Limited Special Pricing Offer-First Three Months MRC Waived - If any Using Agency(ies) enters into a sixty-month agreement for services within the first 90 days of contract award, Crown Castle Fiber will waive the applicable MRC for such services for the first three months of the term, provided that if such Using Agency(ies) terminates the agreement prior to the end of the sixty-month term, it will be responsible for an additional three months under the stranded investment note below. Special construction charges, if applicable, will apply.

15. Crown Castle Fiber does not price services based on Interlata/Intralata delivery. Additional charges may be applied for Interstate connectivity based on bandwidth utilization.

Crown Castle Fiber

CONTRACT NUMBER: 190AN-MTTISAFBOS2022-0827

Crown Castle Fiber Services available in the following states:

AL, AZ, CA, CT, DE, FL, GA, IL, MA, MD, ME, MI, NC, NH, NJ, NY, OH, PA, RI, TN, TX, VA, VT, WDC

** Once a total of 24 months of the Monthly Recurring Cost have been paid by one or more Using Agency(ies) for Services in a given building, the Monthly Recurring Cost for the Fiber Lateral Construction line item for all Using Agencies with Services within that building will be eliminated. The building will then be reclassified as on-net for existing and future Using Agencies.

Billing Structure Description:

1. All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.
2. Internet Service - Internet Service is billed as a single line item for each location.
3. Burstable Internet - Internet bursting is available up to the DIA Port Bandwidth, maxing out at 100Mb for services under 100Mb, maxing out at 1000Mb for services between 100-900Mb, and maxing out at 10G for services between 1G-9G. Customer will be billed standard rates listed above for the Committed Information Rate (CIR), and 110% of the per Mb Bandwidth that bursts above that committed rate (based on 95th percentile of utilized bandwidth, pulled every 15 minutes).

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Notes:

1. **Ceiling Pricing.** Crown Castle Fiber always reviews the specific conditions of a service request in order to develop the most cost effective solution for the customer. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.
2. **Renewal Discount.** If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
3. **Bundled Services Discount.** Crown Castle Fiber has reduced the price for Internet Access Services when bundled with Ethernet services. This pricing is located on the Ethernet Multi-Point services tab.
4. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
5. **Stranded Investment.** If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.
6. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.
7. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.
8. **Time Limited Special Pricing Offer-First Three Months MRC Waived** - If any Using Agency(ies) enters into a sixty-month agreement for services within the first 90 days of contract award, Crown Castle Fiber will waive the applicable MRC for such services for the first three months of the term, provided that if such Using Agency(ies) terminates the agreement prior to the end of the sixty-month term, it will be responsible for an additional three months under the stranded investment note below. Special construction charges, if applicable, will apply.

Billing Structure Description:

All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Notes:

1. Ceiling Pricing. Crown Castle Fiber always reviews the specific conditions of a service request in order to develop the most cost effective solution for the customer. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.
2. Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
3. Bundled Services Discount. Crown Castle Fiber has reduced the price for Internet Access Services when bundled with Ethernet services. This pricing is located on the Ethernet Multi-Point services tab.
4. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
5. Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.
6. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.
7. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.
8. DDoS Defense: CCF can monitor, detect, alert and respond to attacks before customers' network resources are severely impacted. In the event of an attack, the target traffic is re-routed to our in-network scrubbing facility to proceed with a surgical mitigation where the unwanted traffic is removed and the clean traffic is allowed to flow to your network. **MUST BE A CCF Dedicated Internet Access -or- Internet Access Customer to utilize this service .**

Billing Structure Description:

1. All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.
2. Internet Service - Internet Service is billed as a single line item for each location.
3. Burstable Internet - Internet bursting is available up to the DIA Port Bandwidth, maxing out at 100Mb for services under 100Mb, and maxing out at 1000Mb for services between 100-900Mb, and maxing out at 10G for services between 1G-9G. Customer will be billed standard rates listed above for the Committed Information Rate (CIR), and 110% of the per Mb Bandwidth that bursts above that committed rate (based on 95th percentile of utilized bandwidth, pulled every 15 minutes).

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Notes:

1. Ceiling Pricing. Crown Castle Fiber always reviews the specific conditions of a service request in order to develop the most cost effective solution for the customer. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.
2. Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
3. Bundled Services Discount. Crown Castle Fiber has reduced the price for Internet Access Services when bundled with Ethernet services. This pricing is located on the Ethernet Multi-Point services tab.
4. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
5. Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.
6. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.
7. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.
8. DIA Plus: DIA + DDoS Defense service Bundle. Private Dedicated Tier 1 Internet access over Layer 2 Ethernet topology 10mbps-10Gbps + CCF can monitor, detect, alert and respond to attacks before customers' network resources are severely impacted. In the event of an attack, the target traffic is re-routed to our in-network scrubbing facility to proceed with a surgical mitigation where the unwanted traffic is removed and the clean traffic is allowed to flow to your network. MUST BE A CCF Dedicated Internet Access -or- Internet Access Customer to utilize this service.

Emergency Technician Labor - Post Installation Move, Add, and Change, Per Hour	\$400	\$0	\$400	\$0	\$400	\$0

Billing Structure Description:

All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.

Notes:

- Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.
- Crown Castle Fiber Upgrade Plan. Crown Castle Fiber wants to enable its customers to buy the bandwidth and service that they need at the time that they need it. Crown Castle Fiber's RI State customers may upgrade their existing Lit Service at a Crown Castle Fiber-serviced location without an upgrade charge. Crown Castle Fiber will also allow RI State customers to convert a Crown Castle Fiber Lit service to a Crown Castle Fiber Dark Fiber service without a charge for terminating the Lit service; for such conversions, Crown Castle Fiber may require a minimum term for the Dark Fiber service and additional costs (e.g. construction or third-party costs) may apply to these conversions.
- "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
- Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.
- The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.
- Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.

** Once a total of 24 months of the Monthly Recurring Cost have been paid by one or more Using Agency(ies) for Services in a given building, the Monthly Recurring Cost for the Fiber Lateral Construction line item for all Using Agencies with Services within that building will be eliminated. The building will then be reclassified as on-net for existing and future Using Agencies.

Billing Structure Description:

All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Notes:

1. Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.

2. Crown Castle Fiber Upgrade Plan. Crown Castle Fiber wants to enable its customers to buy the bandwidth and service that they need at the time that they need it. Crown Castle Fiber's RI State customers may upgrade their existing Lit Service at a Crown Castle Fiber-serviced location without an upgrade charge. Crown Castle Fiber will also allow RI State customers to convert a Crown Castle Fiber Lit service to a Crown Castle Fiber Dark Fiber service without a charge for terminating the Lit service; for such conversions, Crown Castle Fiber may require a minimum term for the Dark Fiber service and additional costs (e.g. construction or third-party costs) may apply to these conversions.

3. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.

4. Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.

5. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.

6. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.

Billing Structure Description:

All pricing is per-node unless otherwise specified. The standard pricing tables apply only to on-net locations where Crown Castle Fiber has existing fiber. Special Construction charges may apply for off-net locations. "Off-Schedule" is defined as any existing technology with customized configurations that are not listed in the pricing schedule.

Pricing noted as ICB is done so due to variables that cannot be determined until the scope of the required work has been realized. This pricing will be based on the cost of providing the requested service.

Monthly subscription is per site, per bandwidth commit.

Notes:

1. Ceiling Pricing. Crown Castle Fiber always reviews the specific conditions of a service request in order to develop the most cost effective solution for the customer. All the prices are ceiling, not to exceed, prices and Crown Castle Fiber will look to offer better pricing based on the customer's particular application and circumstances.

2. Renewal Discount. If a customer renews a 36 or 60-month initial term agreement for an additional term of 36 months or 60 months, such customer shall be entitled to a 10% reduction in the applicable monthly contract rates for the renewal term. Any such renewal shall be set forth in a renewal service order.

3. Bundled Services Discount. Crown Castle Fiber has reduced the price for Internet Access Services when bundled with Ethernet services. This pricing is located on the Ethernet Multi-Point services tab.

4. "Special Construction" charges may apply where Crown Castle Fiber must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.

5. Stranded Investment. If the customer cancels the service prior to the completion of the initial term, the customer will be responsible for the following stranded investment charge: 1) 100% of the monthly recurring charges remaining in months one through twelve of the initial term, 75% of the monthly recurring charges remaining in months thirteen through twenty-four of the initial term, and 50% of the monthly recurring charges remaining in months twenty-five through the end of the initial term; and 2) all disconnection or termination charges payable to any third parties incurred by Crown Castle Fiber on customer's behalf relating to the service, to the extent such charges are not recouped by Crown Castle Fiber from the payments made by customer under clause (1) above. Such stranded investment charge shall be paid within forty-five (45) days of customer's receipt of the applicable invoice. Customer will not be responsible for stranded investment charges where customer simultaneously orders a replacement service to a location then served by Crown Castle Fiber's existing network ("Replacement Service") with equal or greater monthly recurring charges for an equal or greater term as the cancelled service, provided that customer (i) pays all applicable charges in connection with provisioning such Replacement Service, and (ii) reimburses Crown Castle Fiber for any costs related to the cancelled service, including unpaid Special Construction charges and underlying third-party provider termination fees. Any such Replacement Service shall be documented in an amendment mutually agreed upon and executed by Crown Castle Fiber and Customer.

6. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Crown Castle Fiber will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Crown Castle Fiber service to the customer's location. Crown Castle Fiber will pass through such cross-connect charge without mark-up to the customer.

7. Crown Castle Fiber will provide technician labor for post installation move, add, and change work at rates that are specified above.

8. Managed SD-WAN is a fully Managed Solution which is an application of Software Defined Network (SDN) technology. It is an overlay network running over underlay networks (e.g. public internet, MPLS). It does not interact with the underlay network (transport). Provides a virtual overlay network that enables application aware, policy driven and orchestrated connectivity between SD WAN User Network Interface. Vendor offers Support for multiple underlay options including IP, MPLS, or bring-your-own-transport.

9. High Availability - Dual SD WAN Edge devices deployed at the customer location setup in "Active Passive" configuration to provide redundancy. The two appliances are connected to each other with a fallback mechanism based on pre determined policies, if the primary device has an issue, the traffic will default to the second device.

10. Next-Gen Firewall - Consists of the following additional security features that can be enable if desired including: IP Filtering, URL/Domain Filtering.
